

# Media Analyst for Environment, Science, Technology & Health Issues

Project Title	Media Analyst for Environment, Science, Technology & Health Issues
Project Summary	Help the U.S. Embassy in Hanoi and the broader State Department know what is being written about Vietnam's environment, science, technology and health.
Country	Vietnam

## Project Description

Environment, science, technology and health (ESTH) issues play a dynamic role in Vietnam’s economic and political spheres and are a key area of engagement within the bilateral relationship. Your principle task would be to review available English-language media (and, if you speak Vietnamese as well, Vietnamese language media) news articles focused on ESTH issues and compile a weekly round-up of 5-10 articles for broad distribution within the State Department and other Federal agencies. Other projects may include limited research activities on specific ESTH developments aligned with Embassy needs and your interests.

## Required Skills or Interests

### Skill(s)

Editing and proofreading

Research

## Additional Information

The U.S. Embassy in Hanoi distributes a weekly round-up of articles every Friday based on the research of our intern. In order for us to meet our deadline, we need summaries from our intern to be sent to us every Thursday at the latest. Specific times will be arranged once an intern is selected.

# Language Requirements
